DESCRIPTION
PC Grout is a highly permeable topical additive, designed specifically for “Filling the Voids” of a pervious concrete surface. By creating a safe and smooth permeable surface for traverse, PC Grout addresses the undesirable issues surrounding pervious concrete. PC Grout and pervious concrete are an effective means for protecting the ecological system, recharging the water table and reducing the adverse impacts of developmental stormwater runoff.

MINIMUM STANDARDS FOR USING PC GROUT
• Parameters may vary greatly depending on the project environment and application.
• This product is specifically designed for Pervious Concrete surface installations only.
• Contact your local PC Grout representative for project specific information and questions.

WHERE TO USE PC GROUT
• Driveways
• Parking Bays
• Walkways
• Bikeways
• Public Pedestrian Areas
• Pool Surrounds

ADVANTAGES OF USING PC GROUT & PERVERIOUS CONCRETE
• Surface texture (ADA compliant)
• Reduced clogging potential of pervious concrete voids
• Reduced raveling potential
• High compressive and flexural strengths
• Suitable for low volume vehicular traffic
• Permeability rates exceed 250 in/hr with clean 12-40 sand
• Simple mixture and installation procedures
• Self-leveling and self-compressing
• Resistant to petroleum and UV breakdown
• Resistant to weed growth
• Performs well in freeze/thaw conditions
• Environmentally friendly
• Can easily be cleaned with a blower, vacuum, or pressure washer
• Decreases maintenance associated with pervious concrete
• Increases the Solar Reflectance Index (SRI) of pervious concrete, thus reducing the Heat Island effect.
• Can be dyed or painted
IMPORTANT RECOMMENDATIONS

The permeable rates of PC Grout are directly related to the size and quality of the sand media, and the condition of the existing pervious concrete. Therefore always inspect and clean the pervious concrete prior to installing the PC Grout.

Always use a superior quality filter media sand with a minimum sieve size of 12-40 and a maximum sieve size of 8-16.

SAFETY PRECAUTIONS

The use of safety goggles, gloves, boots and pants are recommended when installing PC Grout.

Refer to MSDS for additional information.

FIRST AID

EYES: Immediately flush eyes, including under lids, with plenty of potable water for 15 minutes. Seek medical attention immediately.

INHALATION: Remove to fresh air, if not breathing, give artificial respiration, preferably mouth-to-mouth. If breathing, give oxygen and seek medical attention.

SKIN CONTACT: Wash thoroughly with soap and water. If irritation persists, seek medical attention.

INGESTION: Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Seek immediate medical attention.

For additional information on emergency procedures, refer to the product Material Safety Data Sheet (MSDS) on the job site or at www.PCGrout.com, or call your local poison control center.

SPILL OR LEAK: Absorb spill with sand, earth or vermiculite. Carefully collect into closed container for disposal according to state and/or local regulations.
